

501 STRIPPER

A HIGHLY CONCENTRATED, POWERFUL, EMULSION FLOOR POLISH STRIPPER

- ECONOMIC TO USE
- STRIPS OLD EMULSION
- WILL NOT DAMAGE FLOOR SURFACES
- CAUSTIC FREE

METHOD OF USE

Check on a test patch the concentrations required to remove the polish. The test patch should be against a wall where least wear and maximum build up has occurred. 501 STRIPPER can be used at concentrations varying from 10-50% diluted in water. Use the lowest concentration that removes polish easily in a reasonable period of time. Prepare a solution of 501 STRIPPER in water, apply liberally, leave for 5-10 minutes, scour using a 'black pad' to remove polish, rinse thoroughly, squeegee off, mop with clean water, apply polish.

SAFETY PRECAUTIONS

Although caustic free, 501 STRIPPER is highly alkaline and contains a powerful degreaser. Care should be taken to ensure that the product does not come into contact with skin and eyes. Wear gloves, goggles and boots. Keep out of reach of all but skilled operators. Contact with skin should be washed off with plenty of water. Contact with eyes should be washed out by irrigation. For detailed health and safety information request a hazard data sheet.

PACKAGING

4 x 5 litre containers.
