- Formaldehyde and its associated products have been linked to cancer
- Formaldehyde has a Maximum Exposure Limit of 2mg/m³.
- The active ingredient in Blue Deoda 2 has no MEL.
- Passes McDonnell Douglas Test CSD No3 For Chemical Toilet Fluids.
- Contains perfumes and dyestuffs to effectively mask faecal aroma.
- Can be used in ALL chemical toilets on coaches, trains, caravans etc.

SPECIFICATION:

Composition: A blend of Quaternary Ammonium Compounds. Perfumes and Dyestuffs.

Appearance: Opaque.

Odour: Characteristic Almonds.

APPLICATION:

As a concentrated chemical toilet fluid, which can be diluted with water for use in all chemical toilets on coaches, trains, caravans etc.

DIRECTIONS:

The concentrate can be diluted up to 50 times as a prime charge if the chemical toilets are emptied and re-charged more than once a week this will sanitize an equal volume of sewage. A 1 to 25 prime charge will allow toilets to be emptied and recharged at monthly intervals. One volume of this prime charge will sanitize up to three volumes of sewage.

SAFETY PRECAUTIONS:

Wear protective clothing when handling Blue Deoda 2. Avoid skin and eye contact. Wash any splashes off with soap and water. Irrigate eyes with clean water. For detailed health and safety information request a hazard data sheet.

PACKAGING 25 and 205 litres drums.
