

## **CGR GEL**

### *CHEWING GUM AND ADHESIVE REMOVER*

- **SOFTENS GUM FOR EASY REMOVAL**
- **A GEL TO CONCENTRATE ATTACK ON GUM ITSELF**

CGR Gel has been developed to aid in the removal of chewing gum and adhesive residues from carpets, upholstery, concrete floors, glass and many other hard surfaces.

The Gel, unlike liquids, minimizes spread of the product, and precisely concentrates the active ingredients onto the gum in question, avoiding unnecessary damage to adhesives, fibres or latex primary backings.

#### **METHOD OF USE:**

The operative should firstly pierce the gum. Dispense CGR onto the chewing gum. Leave in contact for 10-15 minutes. The chewing gum softens and can be easily removed using a suitable scraper. If any gum remains repeat the procedure. Wash area with a suitable cleaning detergent, nylon pads may also be used instead of, or as well as a scraper.

Avoid prolonged contact with poor quality carpets as the backing and/or adhesive may be attacked by CGR. Always wash area after use with a detergent.

#### **HEALTH AND SAFETY**

For detailed health and safety please request a COSHH Sheet.

Packaging: 12 x 750 ml spray & 4 x 5 litre drums
