

PA11

HIGHLY CONCENTRATED ALKALI POWDER CLEANER/DEGREASER

* GOOD WETTING ACTION

* FREE RINSING

* LOW FOAMING

* CAUSTIC FREE

A heavy duty alkaline but caustic free product containing special additives which quickly remove oil and grease deposits.

APPLICATIONS

PA11 finds applications in many types of industries from heavy engineering for oil and grease removal to the food industry for the removal of food soils and general purpose cleaning. PA11 is a heavy duty non caustic powder for cleaning/degreasing ferrous metals (some non-ferrous metals may be cleaned where strict control on dilution and immersion times are maintained). The product contains low foaming wetting agents. PA11 is suitable for use in industrial spray booth washing machines, steam and pressure cleaning machines, immersion soak tanks and for general cleaning of floors and walls.

METHOD OF USE:-

Steam and Pressure Machine cleaning:- Use 10 to 20 grams (1 to 2%) per litre of water in the detergent tank.

Soak Tank Cleaning:- Use 25 to 65 grams per litre of water (2.5 to 6.5%) at between 75 to 85°C.

Spray Booth Washing Machines:- Use 20 to 50 grams per litre of water (2 to 5%) at ambient temperatures or heated to 75 to 85°C.

General purpose floor and wall cleaning and for removing fats , oils and grease in food industries:- Use 20 to 100 grams per litre of water (2-10%) at 40-80°C depending on amount of soil.

PA11 should be made up in cold water. After applications rinse with plenty of water. Use in a mild steel tank. For very hard water areas additions of a rinsing agent to the cleaning tank may be required (1part rinse aid to 10 parts PA11). PA11 will not necessarily remove corrosion deposits. An acidic cleaner may be required (please consult your technical representative).

SAFETY PRECAUTIONS

Handle strong alkalis with care. Wear full protective clothing and wash off any splashes with plenty of water. For detailed health and safety information request a hazard data sheet.

PACKAGING 25kg sacks (tubs on request).
