

PERF. CARBON

APPLICATIONS

Perf. Carbon has been specially formulated for dissolving Calcium Carbonate deposits in plate heat exchangers and related equipment.

METHOD OF USE

For this purpose, Perf. Carbon is normally used at a concentration of between 5-15%.

However the actual dose required varies depending on the type and amount of deposit. Ideally the product should be used at a temperature of between 20-60 Deg C.

SAFETY PRECAUTIONS

Take normal precautions for handling strong acids. Do not mix with bleach or any products containing hypochlorite. For more detailed health and safety information, request a hazard data sheet.

PACKAGING :- 25 litre drums
