

## PERF PASS

### APPLICATIONS

Perf Pass is an alkaline liquid product which has been designed to inhibit the corrosion (passivation) of metal surfaces in plate heat exchangers and related equipment after acid cleaning.

### METHOD OF USE

For this purpose, Perf Pass is normally used at a concentration of 5%. Ideally the product should be used at ambient temperature. A holding time of 30 mins. is appropriate for large installations. The system should then be rinsed before being put into operation.

### SAFETY PRECAUTIONS

Take normal precautions for handling strong alkaline materials. Wear full protective clothing and wash off any splashes with plenty of water. For more detailed health and safety information, request a hazard data sheet.

**PACKAGING** :- 25 litre drums
