

**CONCENTRATED EMULSIFIABLE/WATER DILUTABLE OIL
AND
GREASE REMOVER**

USES INCLUDE:

Vehicle Maintenance	Agricultural Machinery	Engines & Chassis
Concrete Floors	Factory Maintenance	Marine Systems
Metal Components	Wire Production	
Catering Equipment	Sewerage Systems	

PMP 100 is a powerful multi-purpose cleaner for removal of heavy oil and grease where inflammable solvents would be hazardous. PMP 100 is a blend of solvents and detergents.

Water Dilutable
Non Flammable Flashpoint > 60°C
Good Wetting Action
Non Caustic
Highly Concentrated

The solvents will rapidly penetrate and dissolve oil and grease deposits whilst the detergents enable emulsification and rinsing with water. When rinsed with water, a white emulsion is formed which washes residues away easily.

PMP 100 is suitable for use on all metals, glass, enamel, stone and concrete.

METHOD OF USE

Apply by brush, mop or spray. Use neat for heavy soiling or with up to 20 parts of water for lighter oil and grease removal. Being safe on all metals, PMP 100 can be used in soak tank applications up to temperatures of 150 F. PMP 100 has no flash point. Agitation may be required for heavy soils. Rinse afterwards with water.

SAFETY PRECAUTIONS

Although the product has a high flash point it will burn if involved in a fire. No smoking when handling the product. Although not aggressive to the skin, PMP 100 is a powerful degreaser so goggles and gloves should be worn. Wash off any splashes with plenty of water. Contact with eyes should be washed out by irrigation. For detailed health and safety information request a hazard data sheet.

PACKAGING: 25 and 205 litre drums.
