

GRAFFITI REMOVER SOP

SAFE ON PLASTICS

Graffiti Remover SOP has been developed specifically for use on sensitive surfaces such as Plastics and Polycarbonates, surfaces which would normally be attacked by most other Graffiti removers.

APPLICATION

The graffiti daubed on buses, trains and buildings is not limited to hard metal and concrete surfaces. Graffiti on these surfaces can be removed efficiently by current products. Graffiti daubed on plastic seats etc has been removed by these products but the plastic can be irreversibly marked.

Graffiti Remover SOP is highly effective at removing graffiti from plastic materials without adversely affecting it. It is advisable however, to test first to be sure.

METHOD OF USE

Apply the product by spray. Leave product in contact with the surface for sufficient time to allow penetration. Deposits may then be wiped away with a clean soft damp cloth or washed away with water. Work from edges towards the centre turning the cloth frequently to prevent spreading or smearing the graffiti. Stubborn graffiti may require agitation with a non-abrasive pad or a further application of the product. Rinse surfaces with water or diluted PGP500 after use.

SAFETY PRECAUTIONS

For detailed health & safety information please request a Hazard data sheet.

PACKAGING

6 x 750ml Spray Units & 4 x 5 litre drums
