

## DEEPCLEAN DEGREASER

**HIGHLY CONCENTRATED FORMULA FOR A HEAVY DUTY 'DEEPCLEAN'**

**DEEPCLEAN DEGREASER** will have multi use but has been specifically formulated as a heavy-duty kitchen degreaser and carbon remover.

### USAGE:

**DEEPCLEAN DEGREASER** may be used neat, in a spray, wipe on wipe off or in a dip tank.

For lighter duty degreasing or when used on sensitive metals (\*) dilute to 5%.

Repeat on stubborn soiling if necessary. In some cases soak to allow product time to work.

Rinse off with clean water once clean.

\* Avoid contact with aluminium, tin, zinc & its alloys, lead & its alloys, brass and copper.

NB . Although with **DEEPCLEAN DEGREASER**, contact with aluminium should be avoided, the product has been used to clean and degrease aluminium kitchen filters. The product was used at approx 50% dilution, In water. The aluminium parts were immersed for 5 mins approx, agitated and rinsed.

No problems were found. Long term immersion, or use concentrated or hot, may eventually 'dissolve' aluminium with the evolution of flammable hydrogen gas.

However following the instructions will provide favourable results.
