

DE-ICING FLUID AND GEL

- * Specially formulated to cling to the surface
- * Stops ice formation
- * Keeps parts free to work
- * Available as gel or liquid (forms gel on contact with water).

De-icing Fluid/Gel is a highly efficient blend for the prevention of ice formation on tracks and equipment. It is available in both gel and liquid form.

The gel is applied by brush and is thickened so that it clings to the surface giving long lasting protection.

The fluid can be applied by brush or spray.

The fluid has thickening agents incorporated so that it will thicken on contact with water and cling to the surface, giving longer lasting protection.

PACKAGING

FLUID supplied in 25 and 205 litre drums.

GEL supplied in 23 litre buckets.
