

## PERF. CARBON

### APPLICATIONS

Perf. Carbon has been specially formulated for dissolving Calcium Carbonate deposits in plate heat exchangers and related equipment.

### METHOD OF USE

For this purpose, Perf. Carbon is normally used at a concentration of between 5-15%.

However the actual dose required varies depending on the type and amount of deposit. Ideally the product should be used at a temperature of between 20-60 Deg C.

### SAFETY PRECAUTIONS

Take normal precautions for handling strong acids. Do not mix with bleach or any products containing hypochlorite. For more detailed health and safety information, request a hazard data sheet.

**PACKAGING** :- 25 litre drums
