

TOILET CLEANER AND DESCALER (TCD)

A Viscous Acidic Toilet Cleaner/Descaler/Disinfectant.

APPLICATION:

TCD is a sulphamic acid based, pleasantly perfumed, toilet cleaner, descaler and disinfectant.

The perfume deodorizes the stale toilet smells whilst its viscous, highly active formula, means **TCD** clings longer around the bowl for a more thorough action. **TCD** is suitable for use on toilet bowls, urinals, stainless steel and chrome fittings. Other uses include descaling of showers, restoration of glazed surfaces, basins, concrete and terrazzo. **TCD** may also be used as a daily cleaner if required. The product is fast and effective.

TCD has been used successfully for the removal of limescale and water staining from vertical and sloping surfaces such as escalators and cladding where its gel formulation is ideal for clinging to the surface.

DIRECTION FOR USE:

Use neat for urinals or dilute 1:4 for hard surfaces. Apply using a mop, brush, sponge or directly from the container supplied with a jet cap. Allow to soak for at least ten minutes. Stubborn soils, rust or scale may require agitation with a brush. Finally rinse the surface with cold water.

SAFETY PRECAUTIONS:

Take normal precautions for handling mild acids. Do not mix with bleach or any products containing hypochlorite. Avoid contact with skin and eyes. Splashes to skin should be washed off with copious amounts of water. Splashes in the eye should be irrigated with copious amounts of water followed by prompt medical attention. For more detailed health and safety information request a hazard data sheet from our office.

PACKAGING: Boxes of 12 x 1litre.
